Dear Architect,

I wish to apply my experience and toolsets, along with my drive and critical thinking skills, as a junior member of your team. I will quickly prove an asset at the conceptions, design, modelling, or detailing stages of almost any architectural workflow.

Like many recent graduates applying for an internship position, I am a hardworking and creative individual eager to further my architectural career. That being said, my entrepreneurship sets me apart. Recently incorporated, *Studio Mousse Ltd.* has allowed me to strengthen my architecture and multimedia skillsets, while broadening my familiarity with clients, contractors, and the city.

My experience working for small and mid-size firms, coupled with my ability to learn quickly and on the job, has also allowed me to build a strong and varied digital toolset. It is while interning at *Massimiliano Fuksas* that I took it upon myself to learn *Rhino3d* in order to parametrically ease the modelling of complex facades. (Software which I then taught, along with *Revit*, to undergraduate students during my M.Arch at *Carleton University*.) I can also bring strong poly-modelling, texturing, and rendering abilities to bear on projects thanks to my employment at Carleton's *Game Design Stream* and *3DVC*, a start-up game design studio. Moreover, the recent residential work that I have been able to garner has given me the opportunity to flesh-out small buildings from initial design to complete drawing set, and to initiate an efficient pipeline for residential homes utilizing *Revit*, *Autodesk Green Building Studio*, and *3ds Max*.

I am available for an interview at your convenience.

Sincerely,

***Jean-Francois Jacques***
